Technical Data Information

Product name: - Restore-It – clear water-based rejuvenation system

Product Description:

Restore-It is an easy to use rejuvenation system that puts back what the sun has taken away by simply wiping on to faded paint work, signs, vinyl cladding, colorbond roofing and fencing, pool fencing, downpipes and gutters, plastic garden pots and furniture, garage doors, colorbond caravan walls and any powder-coated surface.

How to use this Restore-It system.

Step 1: prepare the surface by removing any chalking, oxidization, dirt, grease etc using ADCOAT "Uni-Klean" concentrated cleaner, then rinse off with clean water.

Step 2: ensure the surface is completely dry.

Step 3: to apply **Restore-It** you will need a clean cotton or lint free cloth.

Step 4: dampen the cloth with the **Restore-It** product and simply wipe onto the surface in a horizontal or vertical motion. Badly faded surfaces may require up to 3 coats to restore the clear UV protection that the sun has destroyed.

Note: Apply light coats otherwise the product may run. Also avoid applying to hot surfaces in direct sunlight.

Restore-It dries very quickly therefore multiple coats can be applied in a short amount of time.

Restore-It contains no silicones, waxes or oils so can be painted over if required.
